No, Simple Green cleaners will not remove a concrete sealer. Simple Green products are water-based, biodegradable degreasers and general surface cleaners. They are designed to lift dirt, grease, and grime, not to break down or strip away durable acrylic, polyurethane, or epoxy concrete sealants. Simple Green +4

To help you visualize the product in question, here is a standard container of the cleaner:

What You Need Instead

- **Chemical Strippers:** Use a dedicated, solvent-based or heavy-duty alkaline concrete sealer stripper designed to dissolve resin and polymer films. Glaze 'N Seal
- **Mechanical Removal:** For stubborn or multiple layers of sealant, grinding, sanding, or specialized shot-blasting machinery is often required. Glaze 'N Seal
- **Role of Simple Green:** Simple Green is sometimes used as a light wash *after* a chemical stripper has already done the heavy lifting to clean up residual residue, but it cannot strip the sealant on its own. Concrete Decor Magazine

For tasks like stripping finishes, watching a visual demonstration can clarify the heavy-duty process required.
